**SPACE
HACK**

Co-Create the Future with us!

GLOBART

SPACE HACK

Join this hackday and meet other creative people to spin your ideas around the future of Clean Space.

To prepare for the future of Space exploration we have to consider the entire life-cycle of space activities - from the early stages of conceptual design to the mission's end of life and even beyond to the removal of space debris.

The three branches necessary to achieve a more sustainable and competitive European space industry are:

eDeorbit

removing a large piece of space debris from orbit

EcoDesign

Designing to address environmental impacts and foster green technologies

CleanSat

Designing to reduce the production of space debris

Bring your own ideas, share them with other young professionals and a diverse pool of experts. Together we can turn a problem into an opportunity. Your action is necessary.

Registration:

Feel free to send your proposals, pitches and ideas or just register for the GLOBART Space Hack. Send an e-mail to fabian.rogatschnig@globart.at
